PLAYBOY PLAYMATE PARTY™

Bally Technologies’ new Playboy Playmate Party takes Bally’s trademark Quick Hit®-style of game play to a whole new level on the award-winning ALPHA 2™ Pro Curve™ game cabinet, which looks, feels, and plays like a traditional reel-spinning slot – but is really a video slot.

In this Playboy-themed game, which features a bevy of 3-D-animated Playboy Playmates wearing the trademark sexy

“bunny suits”, Quick Hit gets quicker during a revolutionary Free Games Bonus not available on any gaming machine in the market today.

During this Free Games feature, the player can win an infinite number of free games. The Free Games Bonus is triggered on reels one, three, and five. Once in Free Games, one Free Game symbol awards an additional free game, meaning that free games can keep retriggering indefinitely and there is no limit to the number of free games which can be won!

Unlike other Free Games bonuses, in the Playmate Party Free Games, the player can win multiple progressive jackpot awards. This occurs when five or more Rabbit Head symbols appear on the reels.

Bally has added even more excitement with an “anticipation animation” when the player wins Free Games; doors will open and gorgeous 3-D Playboy Playmates appear on the screen, dancing and welcoming the player to the exciting Free Games Bonus.

UPPER HAND HOLD 'EM™

The strategy behind the most popular poker game of our time is combined with the action of video slots and award mechanics of video poker in Upper Hand Hold 'Em™ – the exciting new poker concept by Incredible Technologies.

Upper Hand Hold 'Em features a similar play structure as Texas Hold 'Em, where a player is dealt a two-card hand and plays the remaining cards off a five-card community board. Unlike other electronic Hold 'Em-based games, Upper Hand players intuitively compete against 10 hands per round – not artificial intelligence characters – with a goal of winning the most hands and collecting multiple awards from

the game's easy-to-understand pay table.

Upper Hand Hold 'Em is a multi-denom game designed with particular earnings potential when set at pennies. When playing all 10 hands, a typical player bet ranges from 40-cents to fold and \$1 to see all cards and play all hands. With a max bet at \$3, players can qualify for a huge 288,000 credit jackpot for a royal flush during a heart-pounding "All In" bet.

Upper Hand Hold 'Em is one of the newest patent-pending titles in the Magic Touch® Innovation Collection and is available now.
