

iGaming North America

THE ROAD TO REGULATION

MARCH 4-6, 2012 • LAS VEGAS, NV

New for 2012: One-Day Boot Camp Sunday
Main Program Monday & Tuesday

An educational and networking event, iGNA is designed to introduce the land-based businesses of North America to the global iGaming industry.

Are you ready for regulation?

It's no longer a question of IF iGaming will be regulated in the US, but simply WHEN. For some interactive products regulation is already happening in various jurisdictions throughout North America. iGaming North America is designed to inform, prepare and facilitate business networking amongst land-based, online and public sector gaming executives in order to further the discussions critical to the success and progress of the industry.

iGNA's conference program will include unique and informative sessions such as the Visionaries Panel and Audience Participation Session with in-depth policy, operational and technological topics in between and all presented by a fresh and knowledgeable group of presenters.
