Alumiline Slim Series of Rigid LED Light Bars

JKL Components Corporation, a leading lighting technology provider, announces the Alumiline Slim series of rigid LED light bars. Alumiline Slim ZLF-multi series

is offered in multiple LED spacing and in a range of whites from warm to cool light output. Utilizing a sleek design with efficiency and long life, the Alumiline Slim are ideal for a wide range of applications including product display cases, residential and office architectural applications, exhibit design, decorative projects and museum showcases. The rigid white metal casing paired with an extremely thin height profile (4.4mm/.17") presents LED light in a way which is sophisticated, attractive and adaptable to new contemporary interior designs and retrofitting projects alike. Offering long life, low power consumption without UV emissions, these thermally optimized fixtures are protected against dust and splashing water through a thin membrane coating.

The Alumiline Slim series is RoHS Compliant. Drawings, specifications and additional technical information on the ZLF-multi series is available online.

Bixelon Thermal Print Head Cleaning Pens

Maintaining the quality of printed crisp receipts or barcode labels requires the proper cleaning tool. KICTeam has developed a cleaning pen for Bixelon Thermal Printers. The new Bixelon Thermal Print Head Cleaning Pens can be used on any thermal printer, which has an accessible print head. This new cleaning pen is a quick and almost effortless means of removing any leftover adhesive residue or paper dust that can deteriorate the legibility of the print.

The new Bixelon Thermal Print Head Cleaning Pens are being introduced as part of a printer preventive maintenance program. Customers can increase printer longevity and

maintain the quality of printed materials by implementing consistent use of this new cleaning pen.

The new Bixelon product was designed for easy use on printers that have accessible print heads. This new cleaning pen is versatile and cleans any size printer as long as you can touch the nib to the print head surface. This product is ideal for fast and effective thermal printer cleaning and maintaining the clarity of the printed label or receipt. It's really about using the right tools for the job. By using this Bixelon approved product with a proper maintenance schedule, the printers will print clearer and last longer.

UniFLEX™ 55 Series

SDC's new UniFLEX™ 55 series ANSI Grade 1 heavy duty electric strikes retrofits existing ANSI 4-7/8" strike preps without centerline relocation. One strike body with choice of six application faceplates provides compatibility with all cylindrical locks, centerline latch entry locks, mortise locks with or without deadbolts and mortise exit devices.

Features include heavy duty cast housing and keeper, all stainless steel parts, two deadlocking cams for up to 2500lbs locking strength, 1,000,000 cycles, field reversible failsafe/fail-secure, horizontal alignment adjustment, field selectable 12/24VDC operation, Internally Mounted Solenoid no hot keeper, no voltage regulator required. Optional Monitoring includes Latch Status, Keeper Closed and Deadlocked Status and Deadbolt Status. In addition to station monitoring, optional outputs can be used as signal for Request-to-Exit (RTE), forced entry, door ajar, timer reset, anti-tailgate, interlock, airlock and mantrap logic.

Performance specifications include UL 10C, 3 Hr Fire Rated, NFPA-252, CAN4-S104 (ULC-S104) and UL 1034 Security Burglary Resistant. Designed and manufactured by SDC in the U.S.A. ♣
