Enterprise Version of MGT Promotional Kiosk & Electronic Drawing Software

Micro Gaming Technologies (MGT) introduces the Enterprise Version of the MGT Promotional Kiosk & Electronic Drawing software.

MGT is a proven and trusted leader in electronic promotions in over 50 single site casinos throughout the U.S. and now takes electronic promotions to the next level with the Enterprise Version. The unique design of the Enterprise Version interfaces to any one-card player tracking system and gives multi-site operators the ability to cross-market promotions.

MGT turns a touch screen kiosk into a marketing employee that knows real time gaming value of every player in your database. The kiosk works 24/7, moves players out of line 70% faster, and delivers electronic promotions with interactive games similar to video slots. Standing in line for paper drawing tickets and standing around the drum is replaced with electronic drawing entries and an animated virtual barrel distributed to your existing video displays.

The drawing process from the virtual barrel can be conducted independently at one property or simultaneously across the enterprise from a central location.

BLUEBIRD xD™

Bluebird xD™ is an experience that goes beyond the game. The Bluebird xD earns its name, Experience Design, with a suite of sensory innovations that heighten the player experience beyond game content. By mastering every sensory element and implementing new levels of interactivity, this groundbreaking cabinet amplifies the player experience exponentially. More than just introducing a new form factor to casino floors, Bluebird xD creates entirely new dimensions in gaming entertainment and player engagement.

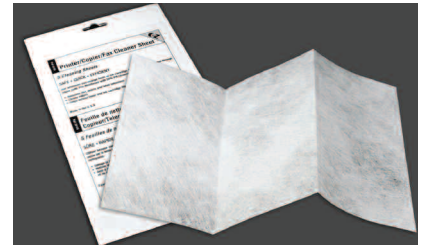

A state-of-the-art emotive lighting system creates a first-time-ever bank-level celebration based on in-game activity. This new dimension of interactivity draws players to game banks with choreographed lighting that underscores their individual experience. The emotive lighting is used to uniquely build anticipation, highlight bonus events and celebrate and broadcast big wins.

All the way down to the synergy of a padded armrest and downloadable button panel, every detail of this crossover cabinet is designed with the player's comfort and convenience in mind.

EZ Printer/Copier/Fax Cleaner Sheet

An EZ Printer/Copier/Fax Cleaner Sheet is being released by KICTeam. A buildup of paper particles, dust, ink residue and other contaminants in the paper path will cause blurry print, streaks or lines on the printed paper. These contaminants need to be removed for the equipment to function as designed. This product offers an easy and effective means of removing these contaminants from the equipment. The unique surface of the cleaning sheet will gently scrub clean paper feed paths and rollers for better overall equipment maintenance and can also aid in prolonging the equipment's life. This new EZ Printer/Copier/Fax Cleaner Sheet has been tested and demonstrated to be more effective than current cleaning methods and products.

Paper carries dust and other contaminants into the equipment causing feed jams or print errors. Taking apart the equipment can be time consuming and costly if not performed properly. This product will be a tremendous asset to consumers. Now they can correct particle buildup and remove lines from documents with a quick and easy cleaning of the printer, fax, or copier.

Printers, faxes, or copiers are used in almost any place of business and many households, as well. This product is ideal for keeping these machines printing as they were designed. ♣
